SUGGESTED SCHEMES FOR THE LAY OUT OF WINDOW RAILS

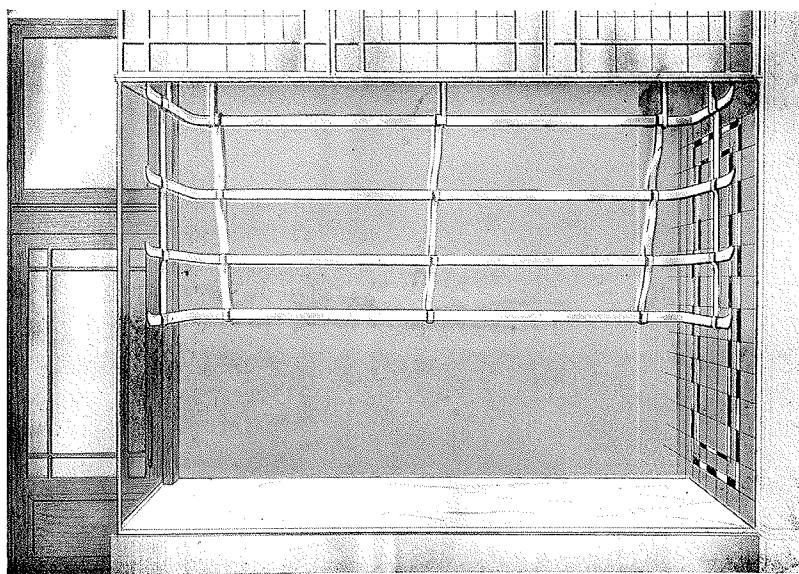

SCHEME A. The latest design and most attractive display of Meat behind Glass, Hangers permanently fixed, or portable to lift off an upper rail. The clear space in centre of bottom rail gives easy access to meat displayed on marble slab.

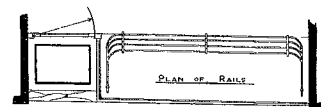

STAINLESS STEEL RAILS AND FITTINGS if washed once or twice a week with a little Soapy Water and polished off with a Soft Cloth will retain their brilliant appearance indefinitely.

NO Polishing Paste or Liquid should be used.

SCHEME B. Similar to Scheme A without space in bottom rail and with all rails returned towards window, with turned-up ends.

Can also be supplied in painted or bright polished mild steel.

STEEL MEAT RAILS

MIRROR
FINISH

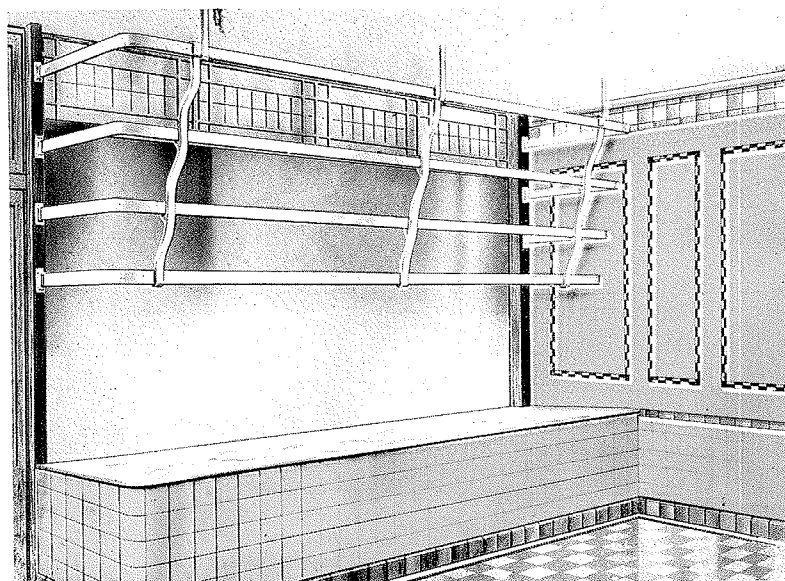

TO MEET THE REQUIREMENTS OF MODERN TRADING

SCHEME C. Straight Display Set of Window Rails, well proportioned with ample spacing. A large quantity of meat can be displayed to advantage and is preferred and recommended by many butchers.

STAINLESS STEEL RAILS AND FITTINGS are the latest refinement for the modern Butchers and Provision Shop, and though higher in price than mild steel are well worth the extra cost.

SCHEME D. Attractively designed and well proportioned Set of Rails in *London Pork* style—for use with leg of pork. Brackets and wood rail and lower shelf for loins of pork.

Also supplied in painted and bright polished mild steel.

INCREASE YOUR COUNTER SPACE.

By fitting one of these Parcel and Basket Racks to the front of your counter you not only make shopping more comfortable by relieving the customer of parcels and baskets, but at the same time you free your counter of the congestion caused by customers placing purchases on the counter top, which at times seriously hampers the assistants.

Lion.
ENCLOSED MODEL

Lion.

GOLD BRONZE MODEL

CAPACITY—4 LBS. 7 LBS. 10 LBS. 30 LBS.

This is a scale for the Butcher, the Dairy or the Provision Merchant. It is supplied in 4 capacities, all of them three times as sensitive and three times as durable as standard scales.

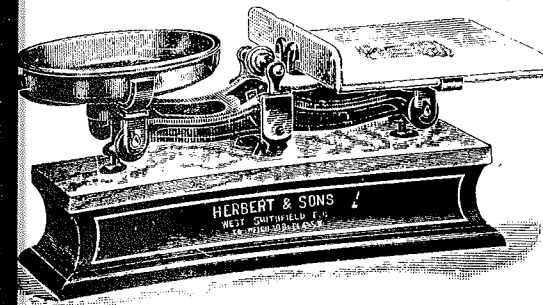

Its design is strong and modern and it is easily cleaned. It's an ornament to any shop but an ornament that earns its keep—in fact it pays for itself in what it saves you.

No Lion scale has been rejected or condemned by the Inspector of Weights and Measures for inaccurate adjustment.

The "Clipper" Block Scraper.

No. 977.

PUSH—
DO NOT PULL.

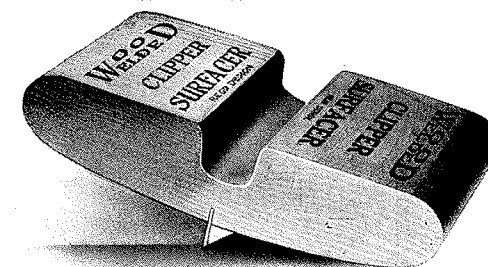

Grip firmly with both hands, push forward. Raise blade from surface on return, at all times keep nose of Scraper on block. Bear down lightly and the surface of the block can be readily scraped clean.

KEEP BLADES SHARP.

The "Clipper" Sharpener, if properly used, will keep the Scraper blade keen and sharp. Place the sharpener against a wall or something solid, hold the surfacer with both hands and push lightly and evenly along file face. Do not rub the blade backwards and forwards, push one way as shown by the arrow on the sharpener.

The "Clipper" Scraper is the handiest and most efficient tool on the market. It does not dig out spots, but enables the Butcher to keep his block flat and level.

Used after the day's work is over, the "Clipper" Scraper will remove the surplus moisture.

The "Clipper" Sharpener will keep the Scraper Blade keen and sharp.

Scrapers 3/6 each.

Sharpeners 3/6 each.

Extra Scraper Blades .. 8d. each.

Never Scrub the top of a Block, Scrape every day and so keep the Block clean and dry.

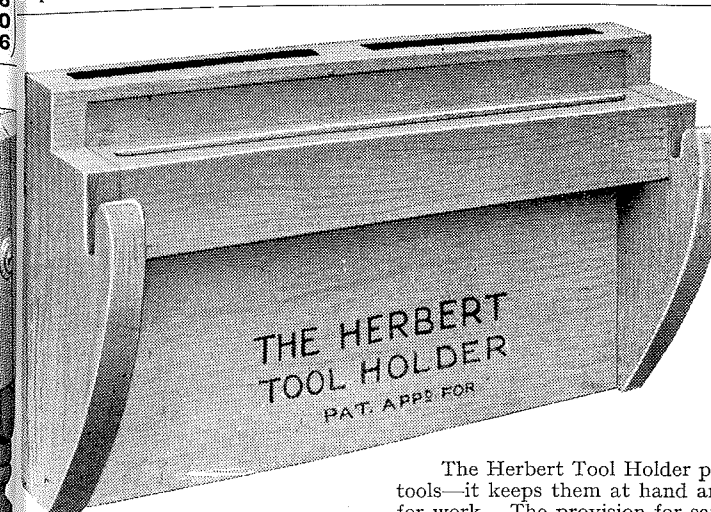

The "Herbert" Tool Holder.

No. 978.

This patented accessory is designed to fill a long felt want.

Price 13/6 each.

The Herbert Tool Holder provides a convenient place for all the butchers' tools—it keeps them at hand and ready for use, and his block is always clear for work. The provision for saw, cleaver and knives keeps these tools always within easy reach when wanted. This prevents accidents and breakage. The actual convenience of the Tool Holder cannot be estimated. **It is a necessity.**

Suggestions for the care of Meat Blocks.

A Meat Block can be kept in perfect condition with a little care each day; if neglected it is certain to deteriorate. To obtain long, useful and satisfactory service, keep the cutting surface of your Meat Block clean and dry.

Don't let fresh wet meats lie on the block longer than necessary; blood, water and brine contain and produce too much moisture, which soaks into the wood, causing the block to expand, softens the wood and affects the glued joints.

Don't wash cutting head of block—a "CLIPPER" block scraper properly used will keep the cutting face in clean and satisfactory condition.

Don't wash your butcher's tools on your meat block; a meat block receives more than enough moisture from the meats laid upon it—do not deliberately add more.

Don't use a razor-edged Cleaver—it will splinter or chip the wood and produce soft spots; your Cleaver should have a dull sharpened edge for best results.

Use "Clipper" Block Scraper each night after the day's work is done and you remove fully 75 per cent. of the moisture on the cutting surface of the block, which will leave it sweet and clean and permit the surface to dry out overnight. Follow these suggestions—you will find it worth while.

MEAT CUTTING TABLES

WITH 3" HARD MAPLE TOPS BOLTED THROUGH.

Superior Maple Tops made of 3" prime Maple Planks.

All joints are tongued and grooved and the tops are bolted right through with ½" mild steel bolts. The ends are fitted with extra stout clamps grooved to fit on to the heavy tongues which are worked up on the solid ends of the boards.

These tops are suitable for Counters, Tables, or Cutting-up Benches, and can be made to any size required. They are supplied with or without Stands.

AFTER 150 YEARS WE PRESENT A
NEW BUTCHERS' STEEL.

"LIONITE STEEL"

No matter for what particular purpose it is produced, it is always
the best of its kind and a new grade is never placed upon the Market
until time and exhaustive tests alone have proved it to be superior
to the steel it supersedes.

THE "LION" ELECTRIC ALARM TILL.

No. 672 E.

An entirely new model of Electric Alarm Till designed to abolish fear of theft. Operated by long life three cell battery connected to powerful G.E.C. Magnet bell. The lid of the till is locked from the front in the usual manner. The drawer is locked from the right hand side, and automatically brings into action the alarm circuit to all parts of the till. When the drawer is unlocked the electric circuit is out of action, and the till may be used for ordinary daily use. This till cannot under any circumstances be tampered with or carried away without sounding the alarm. Size of till overall 20" x 9" x 8". All exterior fittings Chromium plated, and interior fittings as on our Super Model Tills

Price £3 15 0

MODEL No. 2 An exceedingly Strong Cycle of exceptional value. **Price complete £7 10 0** Carriage Paid.
Full Specification on application.

No. 263.

"Lion" Cycles are finished all parts rustproofed and stove enamelled Black by special process.

A NEW SALTING PUMP.

"Lion"
DOUBLE ACTION
SALTING PUMP.
No. 906.

The Pump that will always work.

The Barrel is constructed on the two-stroke principle and is fitted with a **Metal Piston Ring**, thus dispensing with the Leather Washer or Cup Leather, which has always been a source of trouble in dry hot weather.

All exposed parts are either Nickelled Tinned, or Galvanized, and the India Rubber Suction Hose is of high grade quality.

WE GUARANTEE the all-metal two-stroke Pump for 12 months and we are able to do this on account of our sound principal of manufacture.

This Pump is eminently suitable for use with the Curry-Herbert System of salting, but we can supply either perforated or special Curry-Herbert needles for use as required.

Price £3 - 5 - 0

complete with 1 needle.

GUARANTEED FOR 12 MONTHS.

EXTRA NEEDLES.

Beef or Tongue	3/3 each.
For Curry-Herbert System	4/6 each.
" " " " Set of 5 in Wood Case	22/6

We also manufacture the "Lion" Portable Pressure Salting Pump for Wholesale Trade and Bacon Curers, Price List and particulars sent post free on application.

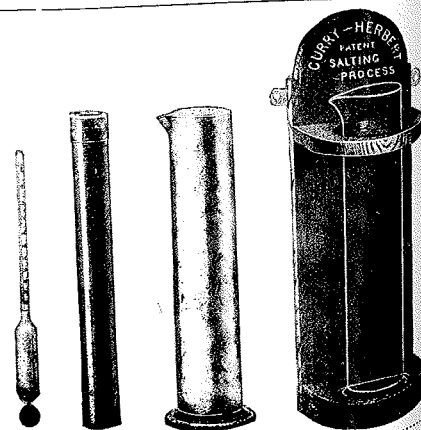

THE CURRY-HERBERT SALINOMETER
or BRINE TESTER. No. 907.

It is impossible to cure consistently unless the strength of the various brines used is kept uniform. This instrument enables the user to **ascertain instantly** the density or strength of any brine, no matter how old or the length of time it has been in use.

Price 4/6

Complete with Test Glass and Wood Bracket 13/6

Spare Test Glasses 3/6 each.

Price 15/6	16/6	17/6

Special sizes made to order.

THE NEW CURRY-HERBERT THREE-MINUTE SALTING AND CURING PROCESS.

NO SHRINKAGE OR LOSS OF WEIGHT.

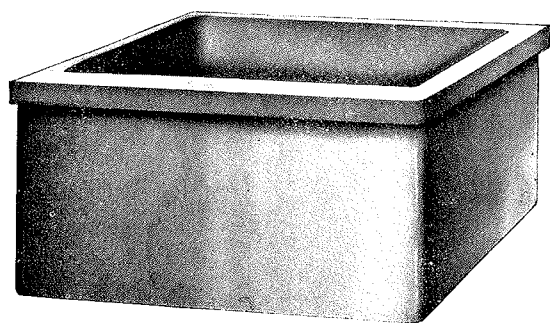

In the old method of salting there was always a small portion of the meat which remained grey in colour because, being situated in the middle of the cut or joint, it had not been reached by the combination of brine and saltpetre. Also the outer portions of the meat become over-salted and more or less tough or hard owing to the excessive absorption of salt. This is entirely obviated when pumped by the new Curry-Herbert Process, which gives an excellent colour to all meats.

Extract from Testimonial :—"The whole system is perfect in every way, and anyone who does not welcome it is refusing money."

Descriptive Booklet sent Post Free on application.

INTO PROFIT} with
the

NEW ECONOMY COOKER

British Made Prov. Patent No. 27602/35

A NEW USE FOR THOSE TROUBLESOME CUTS OF BACON SO OFTEN DIFFICULT TO SELL.

No. 236

Forehocks, Streaks, Pickled Beef, Pork, Tongues, Brawn, etc., are simply rolled and cooked under pressure in the container and when turned out are in the form of an attractive roll—appetising in appearance and easy to slice without waste.

Even scraps of meat can be transformed into a pleasing cooked delicacy—scraps that would otherwise be wasted and represent an entire loss. Cooking instructions with each utensil.

Container of New Silicon Salt resisting Metal and discs of Heat resisting Pyrex Glass.

No. 2 S (6" x 11½") Approx. Capacity 7 lbs. Complete with Steamer .. 24/-

No. 2 (6" x 7") " " 4 lbs. " " " " .. 22/-

No. 2 has both container and discs of Heat resisting Pyrex Glass.

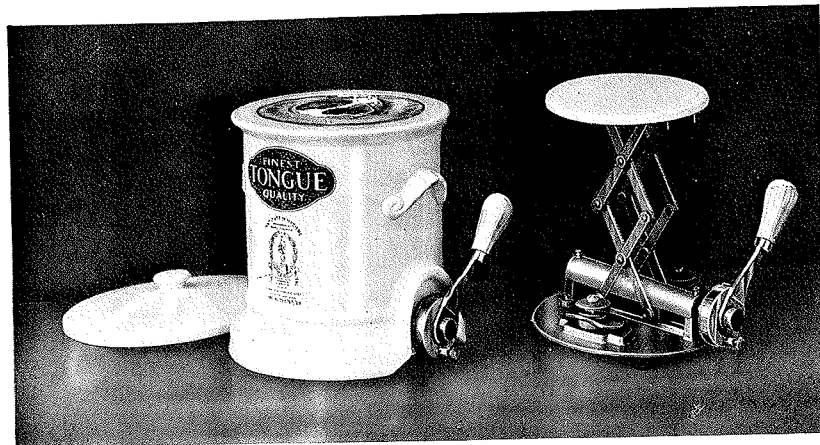

To prepare for cooking, place one Glass Disc in bottom of Container, pack in the meat &c., cover with second glass disc, place spring on top of disc and the metal lid over the spring, clip the lid in place, which locks it ready for cooking. One pint of water only required for the cooking and the smallest glimmer of gas.

After Cooking, if the seal formed by fat around discs is not disturbed, and the Cooker is put in a cool place, the contents may be left in it for a considerable period.

THE "LITTLE CHAMPION" PIE MACHINE.
Price £12 - 12 - 0

Complete with one set of Moulds and 3 dozen round tins.

Kindly select your size from the table given below, and if you cannot see what you want, send your sample tins; we have many other sizes not shown in the table, and will have no difficulty in matching them in size and shape.

The "Little Champion" will make a pie from the smallest up to a 1 lb. size, but for customers wishing to make larger pies, there is built the "Medium Champion" and the "Climax Champion." These two are larger and stronger in design and can make from the smallest up to a 2 lb. and 4 lb. pie respectively, and the prices quoted are complete with One Set of Moulds. Prices on application.

No. 124.	Size	At Top inside inches	At Bottom outside inches	Depth inside inches	Weight of Pie ozs.	Moulds per Set	Tins per Doz.

NOTE—Weights of Pies are only approximate. Naturally the Weight of Pie varies when made in the same tin, according to the amount of meat used. Weights given are based on the average amount of meat used.

THE "LITTLE WONDER" PIE MACHINE
Price £10 - 10 - 0

Complete with one Set of Dies for Tins up to 4" Diameter.

TINS EXTRA AS SELECTED.

This machine will make any Pie, round or oval, by having suitable dies and tins for each size. The different dies can be quickly changed and are instantly locked in position. A gas jet forms part of the machine, and keeps the die warm, and prevents the paste adhering to the die. We can also supply electrically heated dies. If no gas or electricity is available, the dies can be heated in an oven.

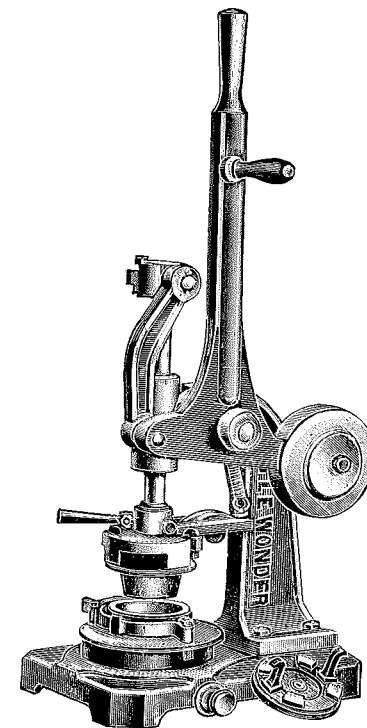

A piece of paste is dropped into the tin and by pulling the lever a pie is immediately formed, the surplus paste being pressed out. After blocking the pies in this way, the licker is put in place and this presses and crimps the paste lids and pares off the rim. Unless ordered otherwise, the machines are sent out set to stamp the paste a bare ¼ in. thick at sides and bottom. This thickness can be varied by adjusting the stop supplied with each machine.

No weighing or rolling out of the paste is needed.

THE "LEVER" PIE AND TART MAKING MACHINE.

Patented in Great Britain and U.S. America.

Saves time and material, prevents waste, ensures uniformity in the shape of Pies and Tarts, and improves their appearance. Any inexperienced person can work it; it is not liable to get out of order; has no springs; is simple, efficient, compact and cheap. Plunger heated by gas in seven minutes, gas cannot come in contact with the paste. It will raise 18 pies or tarts a minute, fix lids and trim off edges at the rate of 25 per minute.

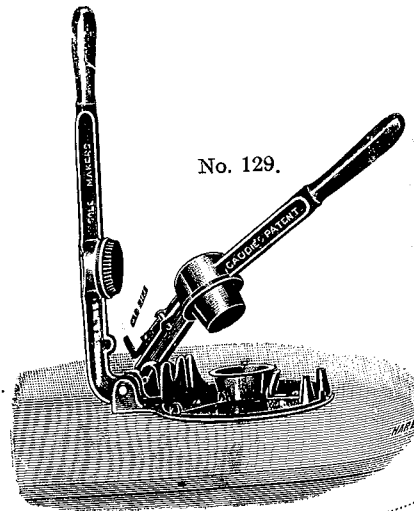

Price of Machine without dies, **£5 5 0**.

ALEXANDER COGLESS MINCERS

Models RWB 98-RWE 130.

Improved design of the famous Alexander two-knife and two-plate power mincer, reducing meat by gradations to any required degree of fineness. Mincer body flanged to a pedestal of very rigid, broad construction to eliminate vibration. All the well-known features have been retained, such as ball thrust bearings, bronze bushes, ring oilers, long shank feed screw, ejecting device and safety hopper complying with Home Office requirements.

RELIANCE SAUSAGE FILLER HEAVY DUTY MODEL

No. 13 No. 14

Approx. Capacity	12 lbs.	16 lbs.
Inside size of Cylinder	14" x 5 1/2"	14 1/2" x 6 1/2"
Price	£9.15.0	£11.5.0

Complete with 3 Nickel Plated Tapered Nozzles 5/8", 3/4", 1" outlet, outside measure.

STRENGTH and SIMPLICITY are the outstanding features in these essentially modern heavy duty "Reliance" Sausage Fillers—note the detachable solid frame fronts and backs which are strengthened to provide extra weight bearings for axles and at other points subjected to heavy stresses and strains.

The solid one piece bridge is designed to give ample overload support to the rack under extreme pressure and the complete frame is not only built rigid but stays rigid. It can be cleaned instantly and if repairs should ever be necessary, they can be effected easily with standard parts.

An efficient barrel lifter is employed with steel roller action, which not only provides a positive support for the barrel whilst raised for filling, but also a really satisfactory lock when lowered into working position.

The barrels are extra heavy and are white porcelain enamelled inside. They are instantly removable for cleaning. Plungers are of the two plate type with rustless steel air valve. The face plate of the plunger is white porcelain enamelled, fitted with solid leather piston. Any leakage is impossible, therefore no accumulation of unclean matter between piston plates.

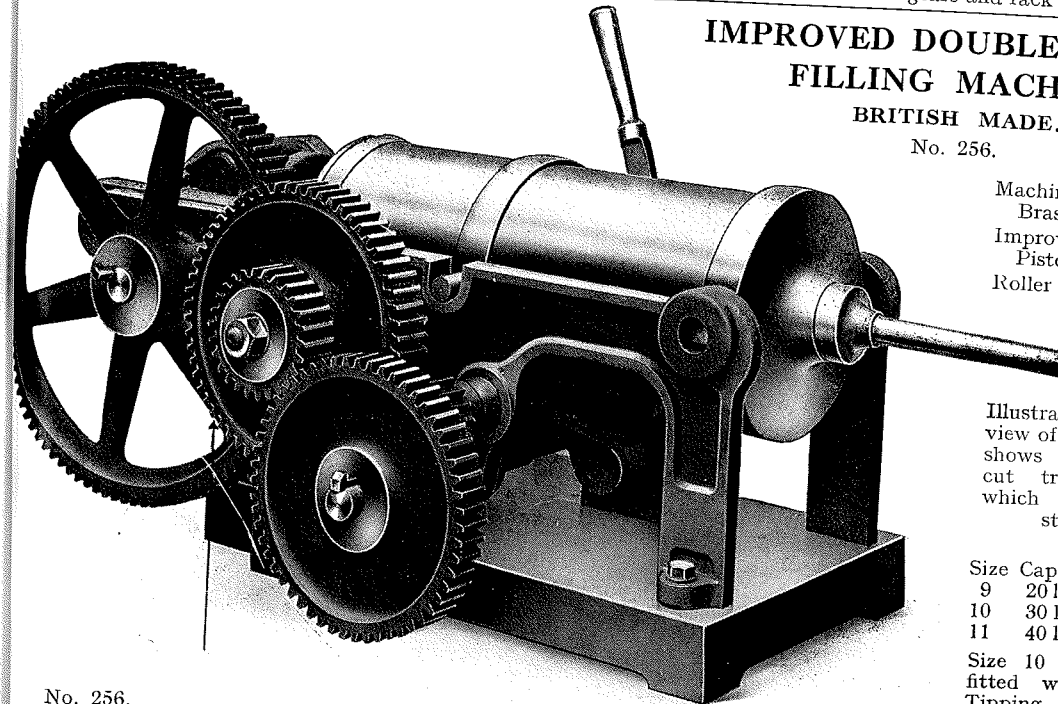

The solid bright steel rack is of wide gauge and more than ample to carry the necessary load. Solid steel cut pinion for drive of pressure stroke. The filler is finished in battleship grey with black handles—gears and rack are bright.

ALEXANDER VERTICAL FILLERS

Great strength, coupled with easy working, place these machines in the front rank for long life and efficiency. Best white metal bearings are fitted throughout and all gear wheels and spindles are machine cut. The Barrel Lid is self-seating and has steel centre-screw and stainless handle. Its bridge is of special steel and hinges on an extended swivel-pin anchored at two points solidly to the barrel. The barrel plunger is leather-packed and its rack is of heavy section and machine-cut.

Model No. 60	Size No.	1	2	4

"OZONE" Keeps the Cold Room FRESH

The value of ozone lies in the fact of its powerful oxidising properties. It instantly combines with and destroys any deleterious organic matter present in the air, or which may be present in the foods or fabric, walls, etc., of the storage chamber.

It has the remarkable property, not only of preventing the formation of moulds, but also of preventing corruption where none previously existed, or of arresting it where it may already have set in, and for these reasons it is being used in an ever-increasing degree for food preservation. It prevents taint from one class of food to another.

THIS SMALL

OZONAIR

APPARATUS

measuring about 6" cube, will keep the air of your cold store in a clean and sweet state.

It will prevent the formation of mould, and will destroy any unpleasant odour.

It will aid in the preservation of the meat, or alternatively, you will be able to keep your stock in a fresh condition for a longer period.

Complete, with 9 ft. flexible cord, plug adapter and isolating switch ready to connect with existing Electric Supply.

Requires no special fixing. Simply connect with the electric supply and switch on.

THE ONLY COST IS ITS FIRST COST.

Current Consumption is practically negligible.

Capacity of Chamber in cubic feet.	Type No.	Price.	Price with regulation for 4 strengths of Ozone.	Nett Prices
200	128 S.	£4 15 0	£6 0 0	
400	128 D.	£5 10 0	£6 15 0	
600	128/3	£6 5 0	£7 10 0	
800	128/4	£7 0 0	£8 5 0	
1000	128/5	£7 15 0	£9 0 0	
1200	128/6	£8 10 0	£9 15 0	

We recommend the apparatus fitted with Regulation for 4 Strengths of Ozone for adjustment according to the quantity of Meat Stored in Cold Room.

NOTE.—Ozonair Apparatus Operates on Alternating Current only.

"Ozonair" Apparatus can also be supplied for Cold Stores of larger capacity. Prices and particulars on application.

POLISHED Aluminium Dredger

No. 889.

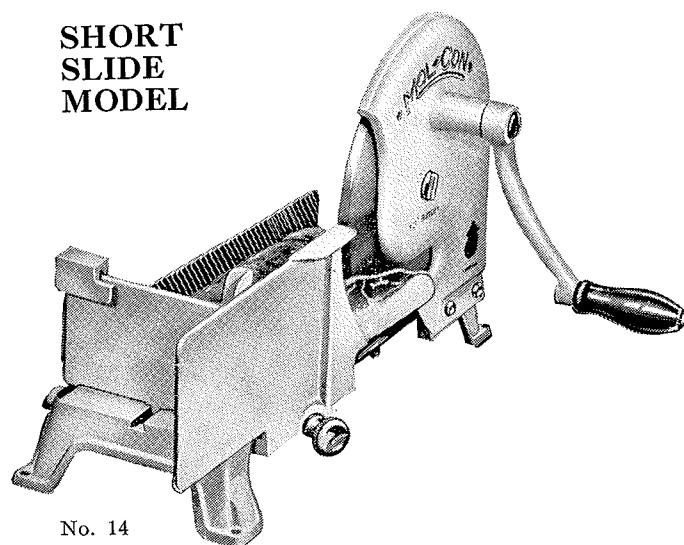

To hold 2lbs. of Rice Flour 3/6 ea.

DIRECTIONS FOR USING SHREDDED SUET

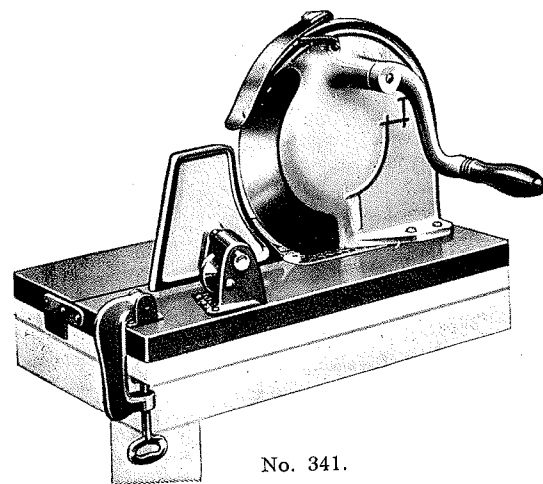

BY THE HERBERT & SONS LIMITED, EASY METHOD.

- (1) Cut the suet into 2" pieces, remove all skin and blood-specks. Spread out on enamel dishes in refrigerator or other cool place until it is quite hard and dry.
- (2) Pass the Suet through a Lion Electric Meat Chopper, one piece at a time. Feed steadily, using the Special Suet Knife and Plate, catching the shreds as they emerge on enamel trays. **You will choke the machine if you try to cram or force the suet through.** Arrange that the shreds are spread out over the trays as much as possible to allow for a free access of air—this facilitates hardening. This may take a few minutes in winter and an hour in summer, according to the temperature.
- (3) Dust the Shredded Suet freely with Pure Patna Rice Flour after it has hardened.
- (4) Transfer the Shredded Suet from the enamel trays on to a hair sieve and "sift" vigorously. This will remove the surplus rice flour (which may be used again) and at the same time break up the shredded suet into small grains. The suet is then ready for sale either loose or packeted.

PURE FRESH SUET SO PREPARED
WILL KEEP FOR MONTHS.

PISTOL

PRICE £5

No. 142.

SMALL
PISTOLPRICE
£5

No Bullet used.

The Mechanical
POLEAXE.

The "Cash" Captive Bolt Pistol is a *mechanical poleaxe*. There is no dangerous bullet—the captive bolt, as its name implies, never leaves the pistol; it is shaped like the spike of a poleaxe, penetrates 2½ in. to 3 in. into the head of the animal, and is instantly withdrawn into the barrel of the pistol ready for use again. Therefore, in effect, it is a poleaxe in which simplicity of handling replaces the axeman's skill, while a small cartridge amply replaces his physical force.

TEMPLE COX PATENT KILLER
NEW UNIVERSAL MODEL.

BRITISH THROUGHOUT.

The only captive Bolt Killer suitable for use upon any animal under any condition.

Lambs and Sheep, in small or large numbers. The light weight and rapidity of operation is ideal, and an instantly attached nose provides for short penetration, preventing damage to brains.

Small Pigs to the heaviest Sows and Boars. The long bolt penetrates to the deep-seated brains and gives a perfect knock-out without "blood splash." Rapidity and ease of handling makes it ideal for pig trap shooting in large abattoirs.

Ordinary Cattle. Gives a perfect knock-out with complete penetration, permitting pithing if desired.

Exceptional Bulls (usually killed with .45 nickel bullet only). The exceptionally deep penetration provided makes it possible to knock-out these animals for the first time with a captive bolt instrument.

Long-horned Cattle. An instantly attachable and detachable long handle enables the slaughterman to stand well away from the head.

Features of great importance in the Temple Cox NEW UNIVERSAL Killer are the following:—

Weight and Excellent Balance. 4½ lb. only, made possible by use of finest procurable materials. Rests comfortably in the hand, thus eliminating hand fatigue on large numbers of animals.

Best Materials. Finest procurable hardened alloy steel non-sticking bolt, unbendable and unbreakable. Chamber block, extractor and firing pin of same hardened steel, giving exceptionally long life and freedom from damage.

Cleanliness and continued Smooth Working.—A new device renders frequent cleaning out of powder deposit unnecessary. Many hundreds of shots can be fired without cleaning.

Surplus Energy Buffer.—New form, lasting for thousands of shots. Easily inserted by user.

Silence of Operation.—Extremely quiet when fired. No report.

THE SMALL "CASH" PISTOL

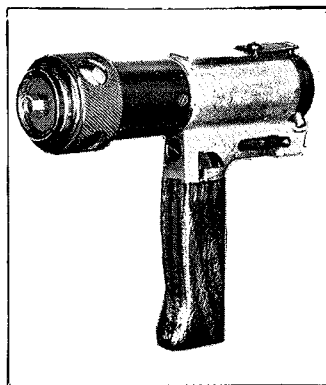

Patents and Patents pending.

To meet the call for a lighter and more quickly handled instrument for the slaughter of sheep and small animals only, the above pistol has been produced.

It operates on similar lines to the standard "Cash" Pistol, but is about 2 lbs. less in weight, and is of the double-action type, being cocked and fired by one pull of the trigger, so that after being loaded it requires the use of only one hand whilst the other hand is holding the animal in position.

The penetration of the bolt is one inch less than that of the Standard "Cash" Pistol, thus ensuring a "clean" head, and it is made to take a short 1½ grain (green label) cartridge only.

Cash Pistol Lubricating Oil 1/- per Flask.
Postage 4d.

and designed
to match
your
own style.

SUPERFRIGOR

LIFETIME
REFRIGERATION

Never before has any Manufacturer offered Automatic Refrigerating Equipments so simple and so scientific as SUPERFRIGOR.

SUPERFRIGOR is the result of 17 years of close, constant and practical study of the Butchering requirements.

SUPERFRIGOR are not made on mass production system but designed specially and individually to answer each User's own and exact requirements. This is why SUPERFRIGOR is a sure guarantee of PERFECT REFRIGERATION and LASTING SATISFACTION.

HERE are a few of the outstanding and exclusive SUPERFRIGOR features :—

SUPERFRIGOR MACHINE : of patented rotary design. The most simple, efficient, reliable and trouble free machines ever devised. No piston, no connecting rods, no reciprocating parts. Just a roller revolving smoothly in lubricating oil.

AUTOMATIC COMPENSATION FOR WEAR : is a revolutionary advance in Refrigeration. SUPERFRIGOR machines are permanent and cannot wear out.

DUO-CONDENSERS : In addition to the usual air-cooled and water-cooled models, SUPERFRIGOR offers an exclusive range of units fitted with duo-condensers combining all the advantages of both air and water-cooled machines.

AIR CONDITIONING : Not merely a cooling system inside the Cold Room but an actual air-conditioning system ensuring constantly a low temperature and positively dry air, two conditions absolutely essential for the keeping of meat in condition.

DEFROSTING ACCELERATORS : Simplifying and accelerating the defrosting process without any variation in the temperature or dryness of the Cold Room.

SUB-FREEZING COMPARTMENT, (OPTIONAL) : An actual small freezer in the Cold Room for maintaining in hard, frozen condition : lambs, shoulders, legs, offals, etc. Most useful all the year round and invaluable for Christmas stocks.

COMPLETE SATISFACTION : Over 500 installations already in operation and that means just as many satisfied and enthusiastic Users.

GUARANTEE : SUPERFRIGOR installations are fully covered by a comprehensive guarantee and free maintenance.

"STEROGEN" STERILIZING & CLEANSING JELLY

Prices

14 lbs. 7/6
28 lbs. 14/-
Carriage Paid.

STERILIZE while you CLEAN with this new STEROGEN JELLY

Sterogen Jelly is both a germicide and a cleanser.

As the former, it is instant death to bacteria, but completely harmless to food or human beings. As the latter, it is seven times more effective than soap or soda and not only cleans, but sterilizes everything in the shop or store—knives, containers, benches, counters, floors, walls.

It removes grease and dirt and the bacteria they carry by dissolving them from metal, glass, fabric or wood. And it does both these things in one operation.

Directions.—Add One Teaspoonful only to every 2 Gallon Bucket of Hot Water to keep your whole Shop, Counters, Walls, Floors, and all equipment Sweet and Clean.

STERO YOUR MEAT

STERO means to wipe all cuts with a Sterogenised Cloth.

See how BRIGHT the meat continues to be.

**Read what
Butchers
have
told us.**

We pass
these tips
on to you.

**A
PREVENTATIVE,
NOT A
PRESERVATIVE**

Butcher No. 1 tells us : "I always wipe all meat with a cloth well wrung out in Sterogen (one teaspoon to a bucket of hot water) before hanging in my safe every night, and more especially at the week-end. This keeps my meat ever so fresh and bright."

Butcher No. 2 says : "I always rinse all mutton cloths in Sterogen and replace on the carcass—this keeps the carcasses very bright."

Butcher No. 3 advises : "Every Monday morning I empty my cold room and wash out with Sterogen."

Butcher No. 4 states : "On arrival from Market I always wipe all cuts and carcasses with a Sterogenized cloth."

Butcher No. 5 declares : "Sterogen does a better job than ordinary soap and soda and my baskets are spotless—try it and watch the results in your shop."

Butcher No. 6 tells us : "In slaughtering I find every carcass, either Sheep or Beef, keeps brighter and longer now that I use Sterogen Jelly in my wiping water."
