LONDON

TRADE MARK.

ESTABLISHED 1760

—❧— HERBERT & SONS, ❧—

6 AND 7, WEST SMITHFIELD, LONDON, E.C.

CONTRACTORS TO HIS MAJESTY'S GOVERNMENT.

HERBERT & SONS have pleasure in submitting for the approval of their customers this enlarged and varied edition of their **Catalogue and Price List**, and trust the great advance they have made in all departments to meet the growing necessities of their business will prove to their friends that they are anxious to keep pace with the continual demand for new and improved **Butchers' Scales, Cutlery, Sausage Machinery and Appliances** so requisite for the modern system of trading, and no trouble or expense will be spared to maintain their reputation for quality and design, without increasing their prices, which they are sure will be appreciated.

Our Cutlery and Tools having now become so well known, being used by most of the leading Butchers in town and country, we have no hesitation in saying that they cannot be excelled for quality, workmanship and price, as they are all **Hand Forged from the Best Double Shear Steel** and tempered by the most skilled workmen. We guarantee all our tools, and willingly exchange any should there be a fault in the manufacture.

Our Patent Smooth Cut Steels will be found a most useful addition to the trade generally, and rightly deserve the reputation they have acquired.

Our New Patent CALF INFLATOR is our latest production, and will be most beneficial in raising the standard of the modern appliances for killing and dressing calves and other animals.

Our Sausage Seasoning has now become so well known that it only needs a trial to test its qualities, which will account for its enormously increasing sale.

Our Preservative Powder is invaluable for preserving and keeping Meat in its natural colour, and Sausage Meat from turning sour in the warmest weather. A trial solicited.

Our Ready Reckoner will be sent, post free, for **3** stamps, and will be found most useful in the desk.

HERBERT & SONS, having unequalled facilities for Fitting up **Butchers' Shops, Slaughter Houses, Cool Rooms and Refrigerators** and Machine Rooms, with every requisite, can guarantee any Orders placed in our hands will receive our prompt and individual attention.

Experienced men sent to any part to take measurements and submit estimates, Free of Charge.

TERMS OF BUSINESS.

BY HER MAJESTY'S

ROYAL LETTERS PATENT.

"HERBERT'S" Improved Needle CALF INFLATOR or WINDING PUMP.

In introducing this Patent Needle Inflator to the trade, we have borne in mind the objectionable manner in which the operation of Blowing Calves and Lambs has hitherto been carried out, and have endeavoured to produce an Inflator capable of doing the work required in a cleanly and efficient manner, and from the opinions and Testimonials already received from eminent Butchers, Slaughtermen, and others, we are convinced we have succeeded.

ELECTRIC MOTORS.

We are now prepared to supply and fix electric motive power suitable for Butchers' machinery of all descriptions.

We may here state a few of the many advantages attained by the adoption of electric driving over that of gas and steam engines:—

(1) The small cost of installing the motors, owing to little or no foundations being required.

(2) The great saving in floor space; the motors may also be fixed to the wall, or ceiling, and thence driving direct on to the machine.

(3) The ease with which new motors may be installed and new wiring run.

(4) The motor only consumes power in proportion to the work given off at the shaft.

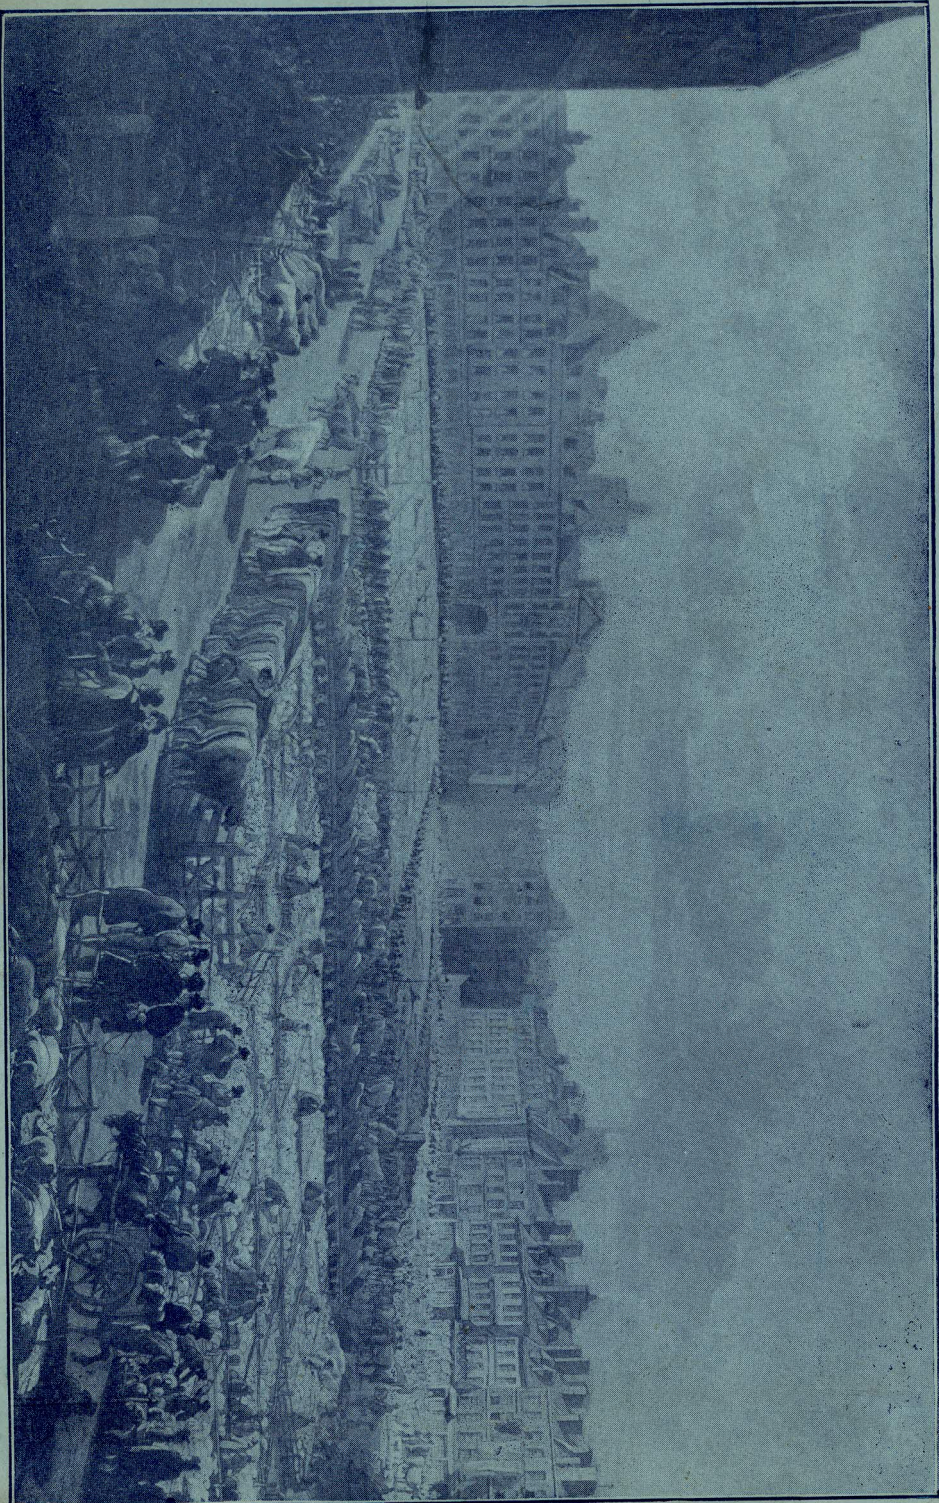

(5) Less wear, tear and maintenance of the motors over that of any other prime-mover, there being only two simple bearings and brushes to wear.

(6) Absolute freedom from vibration, owing to the motion being rotatory and not reciprocatory.

(7) No technical knowledge is required in starting or running the motors.

Motors can be supplied to run on any continuous current, and single, two or three-phase alternating current circuits.

PRICES ON APPLICATION.
