“THE ENTERPRISE” MEAT CHOPPER.

THIS Meat Chopper does not grind or tear the meat, but as its name implies, *chops* it, precisely like the snipping process of a pair of scissors, and if properly put together, it is impossible for any strings, fibres, sinews, or gristle to pass through without being chopped fine and even, the meat coming out in a continuous stream exactly as shewn.

“Solid Marble (as sketch)” MEAT CHOPPER AS A SAUSAGE FILLER.

THE perforated plate and cutter being removed and a Nossel substituted.

No. 111.—Of the different sizes are as follows:—

			MACHINE ONLY.	With Nossels for Filling.

Ornamented with Gold	3 0 0	3 3 0

...ad 10 Clamp to Table.

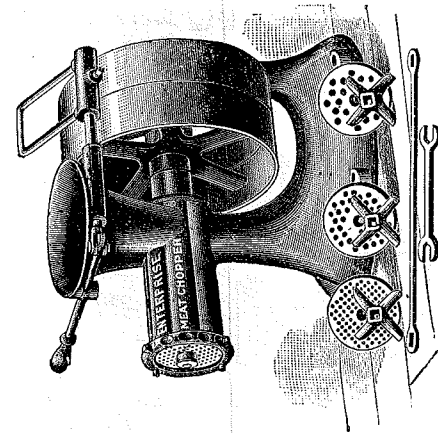

“ENTERPRISE MEAT CHOPPERS FOR POWER.

OUR Meat Choppers have recently received an addition in the shape of Power Choppers, especially simple in design, rapid in chopping, and noiseless in action. Four plates are furnished with each Machine—two fine, one medium, and one coarse. The meat should be passed through the coarse plate first, and then through the fine plate as often as desired until the requisite fineness is obtained.

" 6.—" 18 " " Brass "	5 15 0

IMPROVED DOUBLE-MOTION FILLING MACHINES.

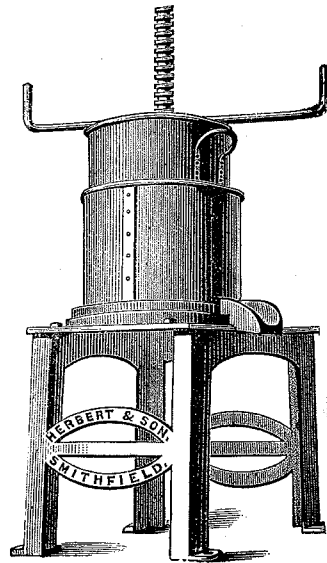

Nos. 9 and 10.

THESE Machines are fitted with cast or wrought iron or brass bored and turned cylinders, improved metallic pistons, air-valve roller on top rack, which takes the friction off the bars. They further possess several other advantages over the ordinary filling machines, namely:—The plunger returns in one-fourth the time takes to go forward, and the machine is worked with one handle, which suffices for forcing the meat out and quick return. All the wheels are at the back of the machine and out of the way of the user.

No. 2.—To hold 20 lbs. of meat	£9 10 0	No. 10.—To hold 30 lbs. of meat	£16 0 0
