- LARGE $\frac{1}{4}$ oz. DIVISIONS

CC 10/20

FULLY AUTOMATIC WEIGHER

GENERAL DESCRIPTION

DESIGN

New-type low level model. Goods plate and chart at the same height to avoid eye strain. Personal contact with the customer. No obstruction of display. Occupies minimum counter space.

EXTERNAL FEATURES

The modern and hygienically styled high gloss fibreglass cover permits easy cleaning and is fitted with special dust caps to protect the mechanism from dust and damp. The goods plate is of polished perspex, or a stainless steel pan can be fitted if required.

READING SYSTEM

No complex optical or reflection systems are used. The operator has a direct chart reading of exceptional clarity. Illuminated by special fluorescent lighting.

OPERATION

No hand setting of prices is necessary at all on the butchers' model, thus the problem of complicated price setting devices has been avoided.

CAPACITY

The machine can be supplied in either 10 lb. or 20 lb. capacities. A simple change-over mechanism takes the capacity from 10 lb. into the 20 lb. range.

CHART

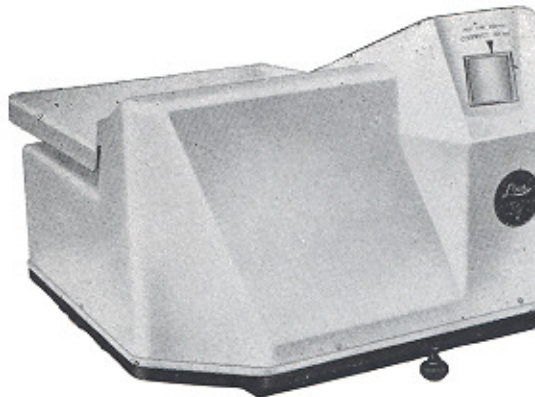

The weight chart is graduated by large 1/2 oz. divisions. The price chart, of exceptional clarity, is marked with 1d. divisions up to 6/- per lb. and thereafter by 2d. divisions up to 10/- per lb.

MECHANISM

The latest engineering methods are used in the manufacture of this machine combined with tried weighing machine practice and skilled craftsmanship.

PRE-PACK MODEL

This machine is fitted with a simple price selection handle, and a positive yet sensitive tare device. Maximum tare 1 lb.

SPECIFICATION

Capacities :	10 lb or 20 lb. x 1/4 oz divisions
